- Node.js, Nest.js, Express.js, TypeScript
- Microservices Architecture, REST API
- PostgreSQL, SQL Server, MongoDB, MySQL, Redis
- AWS (EC2, RDS, S3, Lambda, Serverless, CloudWatch, CodeBuild, CodePipeline)
- Jira, Bitbucket, GitHub, pgAdmin, MongoDB Compass, VS Code, Windows, Linux

Experience

Senior Software Engineer | OneClick IT Consultancy | August 2024 - Present
Ahmedabad

CentarcGlobal – Wearable Safety Devices : developed the backend for emergency alerts, location tracking, and audio recording, implementing geo-fencing and alert systems via Firebase, email, and SMS, also created subscription plans, discount systems, and an admin panel for real-time tracking and user management.

Trevag Travels – Flight & Hotel Bookings : contributed to a B2B and B2C platform with multiple user roles, developing dashboards, user management, wallet integration, and booking listings, while creating complex reports for business insights.

Senior Software Engineer | TatvaSoft | January 2021 - August 2024
Ahmedabad / Work From Home

Call Boats: Developed booking functionality for autonomous boat networks.

Connexion Mobility: Worked on a vehicle rental platform with contract management and other features.

BounceBack: Created a social network for orthopedic injury recovery with features like friend suggestions and posting, etc.

Wizcart: Contributed to an e-commerce service marketplace with service categorization and provider matching.

- Awarded 'Start of the Month' in November - 2024.
- Appreciated for the training and onboarding process for interns, including interviewing, finalizing training plans, and conducting training sessions.
